

POSITIVE COVID 19 CASE

Thank you for taking every precaution to keep yourself and your family safe and for following up on any symptoms you/your child may experience.

Symptoms caused by the current COVID variants are very similar to those of a regular cold. Some people also have experienced general symptoms such as nausea, muscle pains, diarrhoea and skin rashes.

This means that it's not possible to know for sure what you've got based on symptoms alone

A new sore throat, runny nose or unusual fatigue should be treated as COVID until you've been tested. We thank you for your follow up in order to keep everyone safe.

- If one of your children is diagnosed as Positive COVID 19 please contact the school immediately on 94050600
- If you are advised out of school hours that one of your children is Positive COVID 19 please contact Mrs James on Maree.James@education.wa.edu.au

Please mark the email as URGENT: use **URGENT POSTIVE 19 CASE** as the title
